

# AGRICULTURAL FILMS & PACKAGING

For growing & packing fresh fruits & vegetables and other agricultural needs

## Greenhouse Covers

- Strong 3-layer co-extruded film up to 4 seasons
- Additive: IR, EVA, UV absorber, UV stabilizer, anti-fog, disease control, light diffusion, foaming agent, anti-dust or anti-petal blackening
- Available in clear, white or yellow colors
- Protection & enhancement of crop growth & harvest
- Optimum light transmittance
- Minimize day/night temperature fluctuations

## Low Tunnel Film

- Co-extruded PE film in up to 3 layers
- UV protection
- Regular or thermal film
- For earlier planting & harvest with higher yield & quality
- Maintenance of high plant & root temperatures
- Protection of crop against climate aggressions
- Minimized day/night temperature fluctuation
- Control of insects & varmints

## Mulch Film

- Co-extruded PE film in up to 3 layers
- Available with perforation
- Available in a variety of colors: black, brown, clear, silver & white
- Regular or thermal mulch with UV stabilization for 12 months
- Prevention of water evaporation, direct ground contact, weed growth & soil erosion
- Optimization of root temperature, increased light reflection & repelling insects

## Soil Disinfection Film

- Co-extruded PE film up to 3 layers
- Available as solarization or regular film
- Solarization film: relies on solar energy to disinfect soil, protect the environment & prohibit destruction of beneficial organisms
- Regular film: relies on conventional fumigation mode to effectively disinfect soil

# AGRICULTURAL FILMS & PACKAGING

For growing & packing fresh fruits & vegetables and other agricultural needs

## Silage Cover

- Multi-layer PE film to protect all types of livestock forage stored in silage pits, silos & haystacks
- Available in black, white, white/black or green/black colors
- Elimination of light, water & air keeping animal feed fresh
- Fostering lactic fermentation for high-protein silage

## Geomembranes

- PE pond liners for potable water, agricultural, recreational, municipal & industrial applications
- Resistance to rodent & insect attack
- Resistance to UV radiation, puncturing, tearing, or cracking, to high temperature fluctuations & to chemicals
- Reliable joining & extrusion welding

## Co-Extruded Bags for Packing Compost & Landscaping Materials

- UV-stabilized, co-extruded film up to 3 layers for packing compost, top soil, potting soil, peat moss, perlite, vermiculite, pumice, sand products, bark landscaping mulch, wood chips & fertilizers
- Mono or bi-color with printing up to 8 colors
- Sheets for FFS machines or open-mouth bags
- Maintain freshness of packed products

## Protective Bags for Bananas

- PE tie or regular bags, roll or bundle to allow adequate ripening of bananas
- Faster & more trustworthy harvest
- Protection from birds & pests and from external natural conditions (wind, rain & sun damage)
- Prevention from mechanical injuries (marks & scratches)

For packing, storing & displaying fresh fruit & vegetable produce

## Corrugated Banana Boxes

- Worldwide standard 2-piece banana cartons
- Standard sizes:  
485 x 320 x 210 mm  
503 x 338 x 214 mm
- Attractive graphics
- Customized to your requirements

## Corrugated Open-Top Trays

- Made according to CFI (600 x 400 mm footprint) & CF2 (400 x 300 mm footprint)
- Increase pre-cooling by 40%
- Interlocking system to allow a mix of CFI & CF2 on one pallet while maintaining perfect stacking
- Different corner styles available
- Ideal for packing apples, oranges, citrus, grapes, lettuces, melons & other fruits & vegetables
- Customized to your required dimensions

## Corrugated Dispa-Bins

- Heavy-duty double or triple wall corrugated bins
- High-resolution printing for retail purposes
- Optimized pallet handling:  
800 x 1200 mm  
1000 x 1200 mm footprint
- Ideal for packing watermelons, melons, potatoes, oranges, cabbages & lettuces
- Customized to your requirements

## Corrugated Dispa-Trays

- Optimized pallet handling footprint:  
800 x 1200 mm  
1000 x 1200 mm
- High-resolution printing for retail purposes
- Easy manual & automated forming
- Ideal for packing cherries, apricots, peaches & more
- Can be treated for increased moisture resistance

# AGRICULTURAL PACKAGING

Indevco Paper Containers  
A division of INDEVCO group

For packing, storing & displaying fresh fruit & vegetable produce

## Edge Protectors

- Available in different dimensions: width, length & thickness
- Prevent complaints, claims & lost orders
- Support pallets & provide stacking strength
- Protect edges
- Prevent strapping damage
- Improve product image
- Ideal for stretch wrap systems
- 100% recyclable & environmentally-friendly
