

FINANCE SERVICES

1. Scope

INDEVCO's Finance Consultants advise and assist clients in developing financial strategy and in monitoring implementation across clients' business units. Finance consultancy supports functions to reduce financial risks and to ensure business continuity.

2. Objectives

INDEVCO's Finance Consultants engage directly with the client to:

- Recommend group-level, division, and/or business unit financial strategy
- Assist in developing financial processes and their respective reports and in deploying them for execution
- Assess financial risks and develop respective action plans for mitigation
- Ensure insurance coverage on all financial transactions
- Monitor collection processes and customer credit terms
- Coach business units on closing findings related to financial audits
- Recommend financial analysis reports for senior management
- Assist with banks and suppliers for facility agreements

3. Global Network

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
