

MANUFACTURING & ENGINEERING CONSULTANCY SERVICES

1. Scope

INDEVCO's Manufacturing & Engineering Consultants advise and assist clients in planning and executing improvement projects related to infrastructure and in purchasing machinery and upgrades aimed at improving the efficiency and working environment of clients' plants.

2. Objectives

INDEVCO's Manufacturing & Engineering Consultants engage directly with the client to:

- Recommend purchase of advanced technologies and machinery at optimum prices
- Develop return-on-investment (ROI) studies on new equipment before purchase
- Conduct feasibility studies related to infrastructure improvement projects
- Estimate project budgets
- Assist in executing projects on time in full compliance with statutory and regulatory requirements
- Assist in analyzing machine performance and benchmarking results
- Assist in developing contractual standards and approving contractors
- Provide technical consultancy to the client's division and business unit management
- Assist in developing dashboards to monitor production efficiency

3. Global Network

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
