

PROJECT MANAGEMENT SERVICES

1. Scope

INDEVCO's Project Management Consultants advise and assist clients on turnkey construction projects and ventures. The scope of project management technical and consultancy services ranges from project conception to planning, implementation, and handover.

2. Objectives

INDEVCO Project Management Consultants engage directly and indirectly with the client to:

- Advise on the implementation of all phases required during a turnkey construction project, including industrial land /site selection and acquisition, design drawings, bill of quantities, bid drawings contract specification, bid collection, bid analysis and contract award, full-time supervision on execution, and construction management during the course of the project, including cost control, schedule tracking, and more)
- Recommend expert opinions regarding Engineering Services, construction companies, and sub-contractors, as well as review and issue design drawings for the client's project
- Provide Construction Supervision services, ranging from partial services (bid analysis and assistance with the contract award) to full services (from budgeting to bid analysis to construction site monitoring)

3. Global Network

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
