

## **RESEARCH & DEVELOPMENT SERVICES**

### **1. Scope**

INDEVCO's Research & Development Consultants advise and assist clients in researching, developing, and benchmarking raw materials, packaging products and energy alternatives through scientific testing and technical support.

### **2. Objectives**

INDEVCO's Research & Development Consultants engage directly with the client to:

- Assist in developing novel products and validating materials for the client's business unit(s)
- Provide technical expertise in the fields of polymers, forestry, paper, and tissue through symposiums and research projects
- Advise and assist in enhancing the client's product portfolio through high accuracy testing and expert level analysis in line with international technologies and standards
- Advise and assist in testing and documentation within laboratories, in order to implement procedures and policy to provide adequate service to the client

### **3. Global Network**

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
